

Technical Workshop Edition

Leveraging Rancher Federal within the U.S. Government/Public Sector

Zack Brady – Field Engineer
zack.brady@rancherfederal.com

CAGE Code: 8GLZ3
DUNS: 117387835

Today's Agenda

- 1) Introductions / Overview**
- 2) What's a Container? Kubernetes?**
- 3) Why Rancher Federal**
- 4) Open-Source Ecosystem**
- 5) The Rancher Federal Approach**
- 6) Rancher Government Carbide**
- 7) Demo / Workshop (my favorite)**

About Me...

- **DoD/IC Contractor**
- **U.S. Military Veteran**
- **Built/Exited a Digital Firm**
- **Open-Source Contributor**
- **Career of Software/DevOps**
- **Active Volunteer FF/EMT**

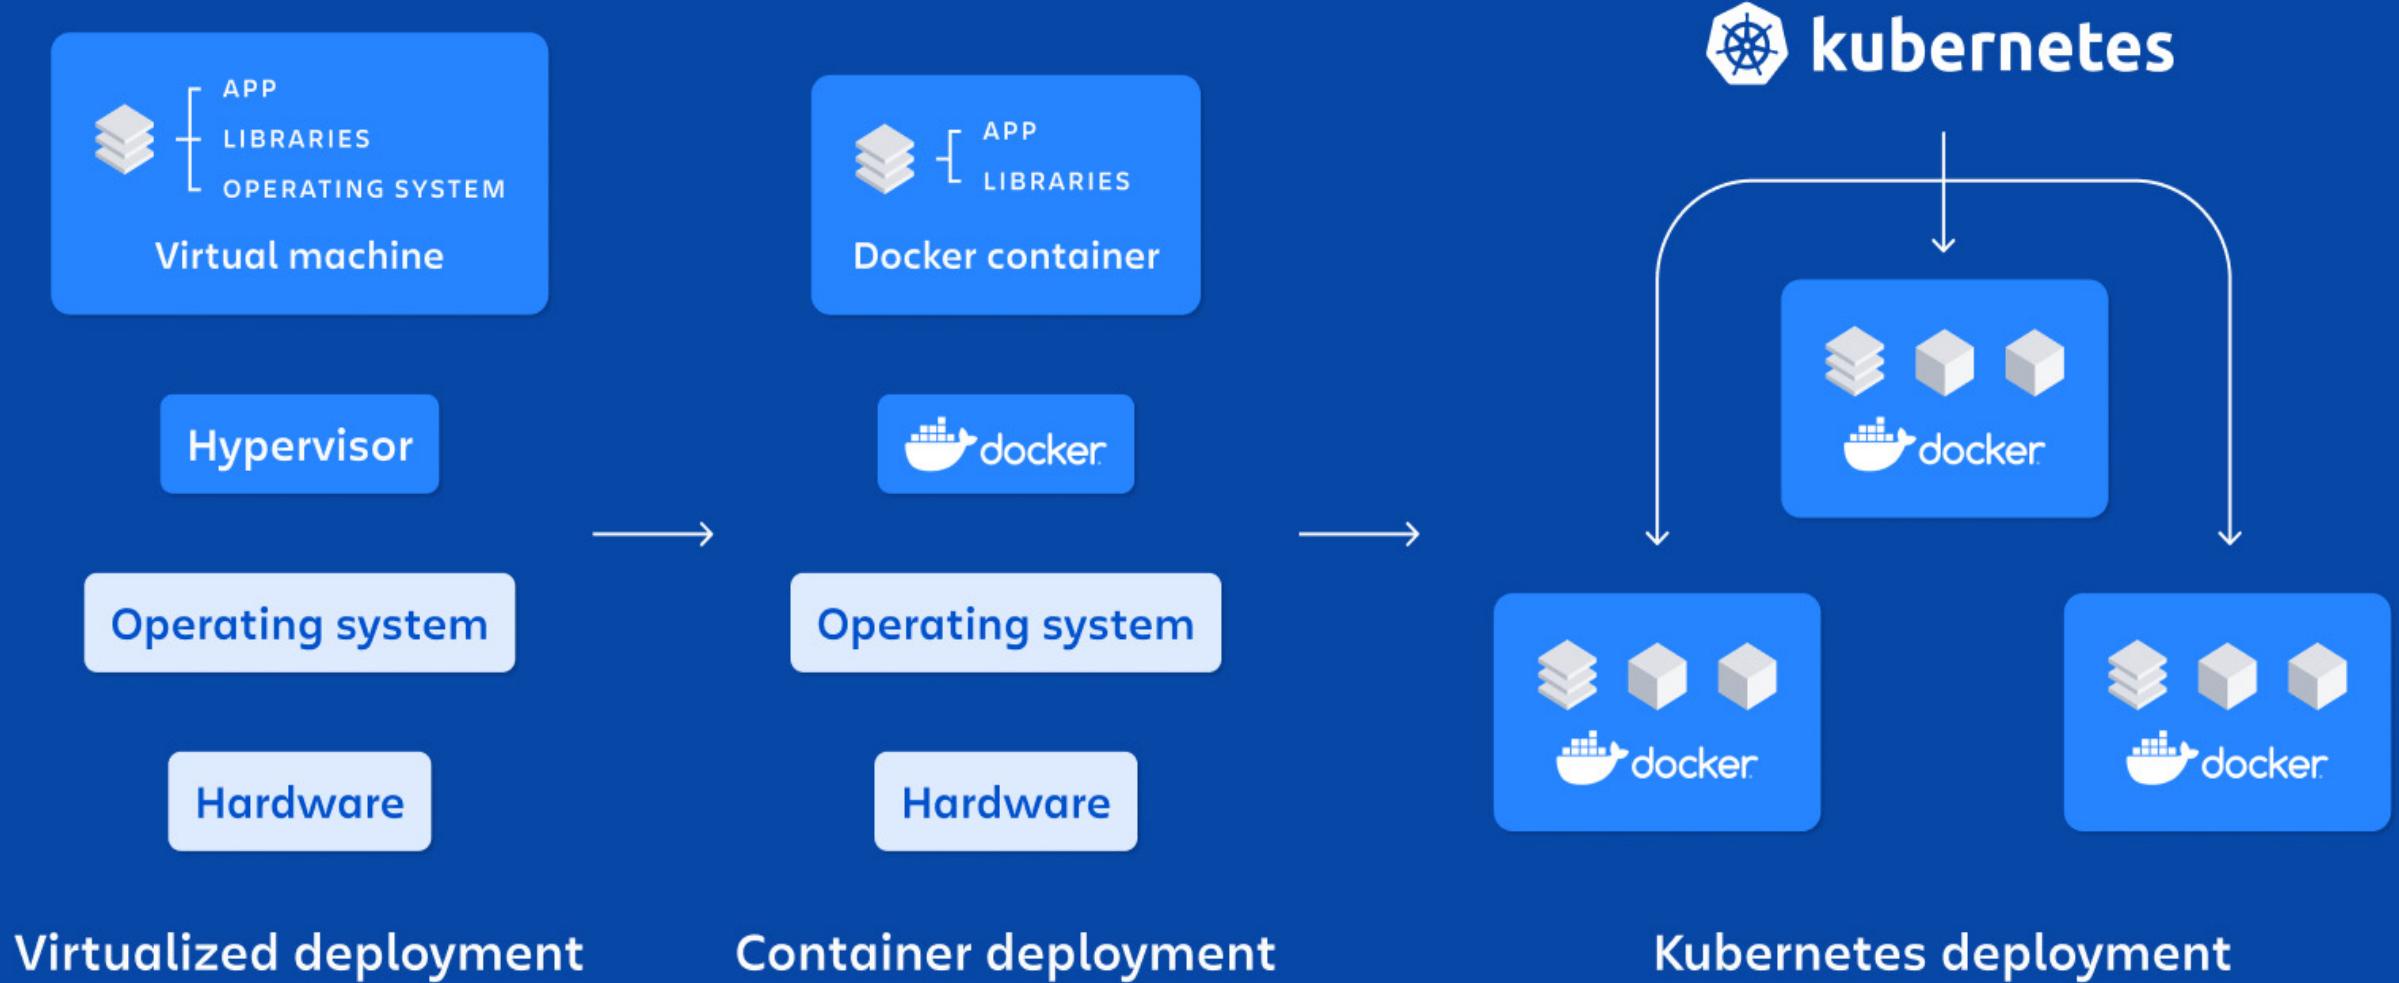

Zack Brady – Field Engineer

VMs → Containers → Kubernetes!

Rancher Government Solutions

Engineering Cloud Native Computing Platforms for the US Government

Rancher Federal (RGS) is a 100% US-based entity dedicated to delivering Kubernetes and Cloud Native Technology solutions and support across the DoD, IC, and Federal community.

Rancher Federal (RGS) offers varying levels of service including US-State Side Support and cleared on-site support.

Rancher Federal (RGS) exists to enhance Rancher's capabilities to meet the ever-evolving Federal mission requirements.

STIG/CIS Hardening & Validation

SELinux and FIPS-2/3 Compliance

Air-Gapped , C2S, SC2S, GovCloud Support

PKI Authentication

Enterprise Audit Functionality

Rancher's Three Pillars of Success

Accelerating Mission and Driving Success

Enterprise Support

- 24/7/365 U.S./CONUS based Enterprise Support for Rancher and the Kubernetes Ecosystem.
- Technical Account Manager and Bootstrap Architecture Support
- Cleared Onsite Engineers and Support Teams
- 70% of RGS hold a TS//SCI or higher clearance
- Continuous Training & Education

Professional Services

- On-Site, On-Premises, or Remote Cleared Engineers
- Cloud-native Advocates and Evangelists focused on bootstrapping or delivering customer success
- Multiple Prime Contracts at USAF PlatformOne and many Subcontracts across the DoD/IC Communities
- Ranges from Hands On Support to Quarterly Meetings

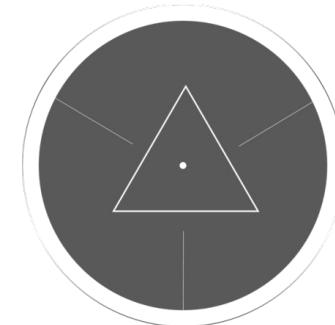

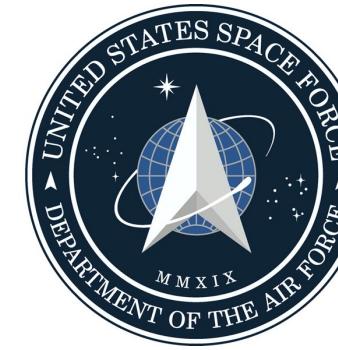

Mission - Accelerator

- Dedicated to weaponizing the Rancher products to work better in airgap/offline/classified mission environments
- Bringing a security-first mindset to the Rancher capabilities by baking in NIST FIPS-140-2/3 encryption & DISA STIG certification/validation
- Collaborated to develop the RKE Government/RKE2 secure-by-default Kubernetes distribution

Worried about STIGs? Concerns with ATOs?

Products and Projects

COMMERCIALLY SUPPORTED
PRODUCTS

RANCHER

Flagship product – Rancher Multi-cluster Manager is world's most popular Kubernetes Management platform

LONGHORN

Highly available persistent block storage for microservices-based, stateful applications

RKE 2

A CNCF-certified Kubernetes distribution that built to the security requirements of the DoD/IC

K3S

A CNCF-certified, Lightweight Kubernetes distribution. Easy to install, half the memory, all in a binary less than 100MB

FLEET

GitOps & Continuous Delivery at scale. Deploy & manage thousands to millions of clusters at the network edge

OPEN SOURCE
PROJECTS

SUBMARINER

Built to connect overlay networks of different Kubernetes clusters

RANCHER DESKTOP

KUBEWARDEN

HYPPER

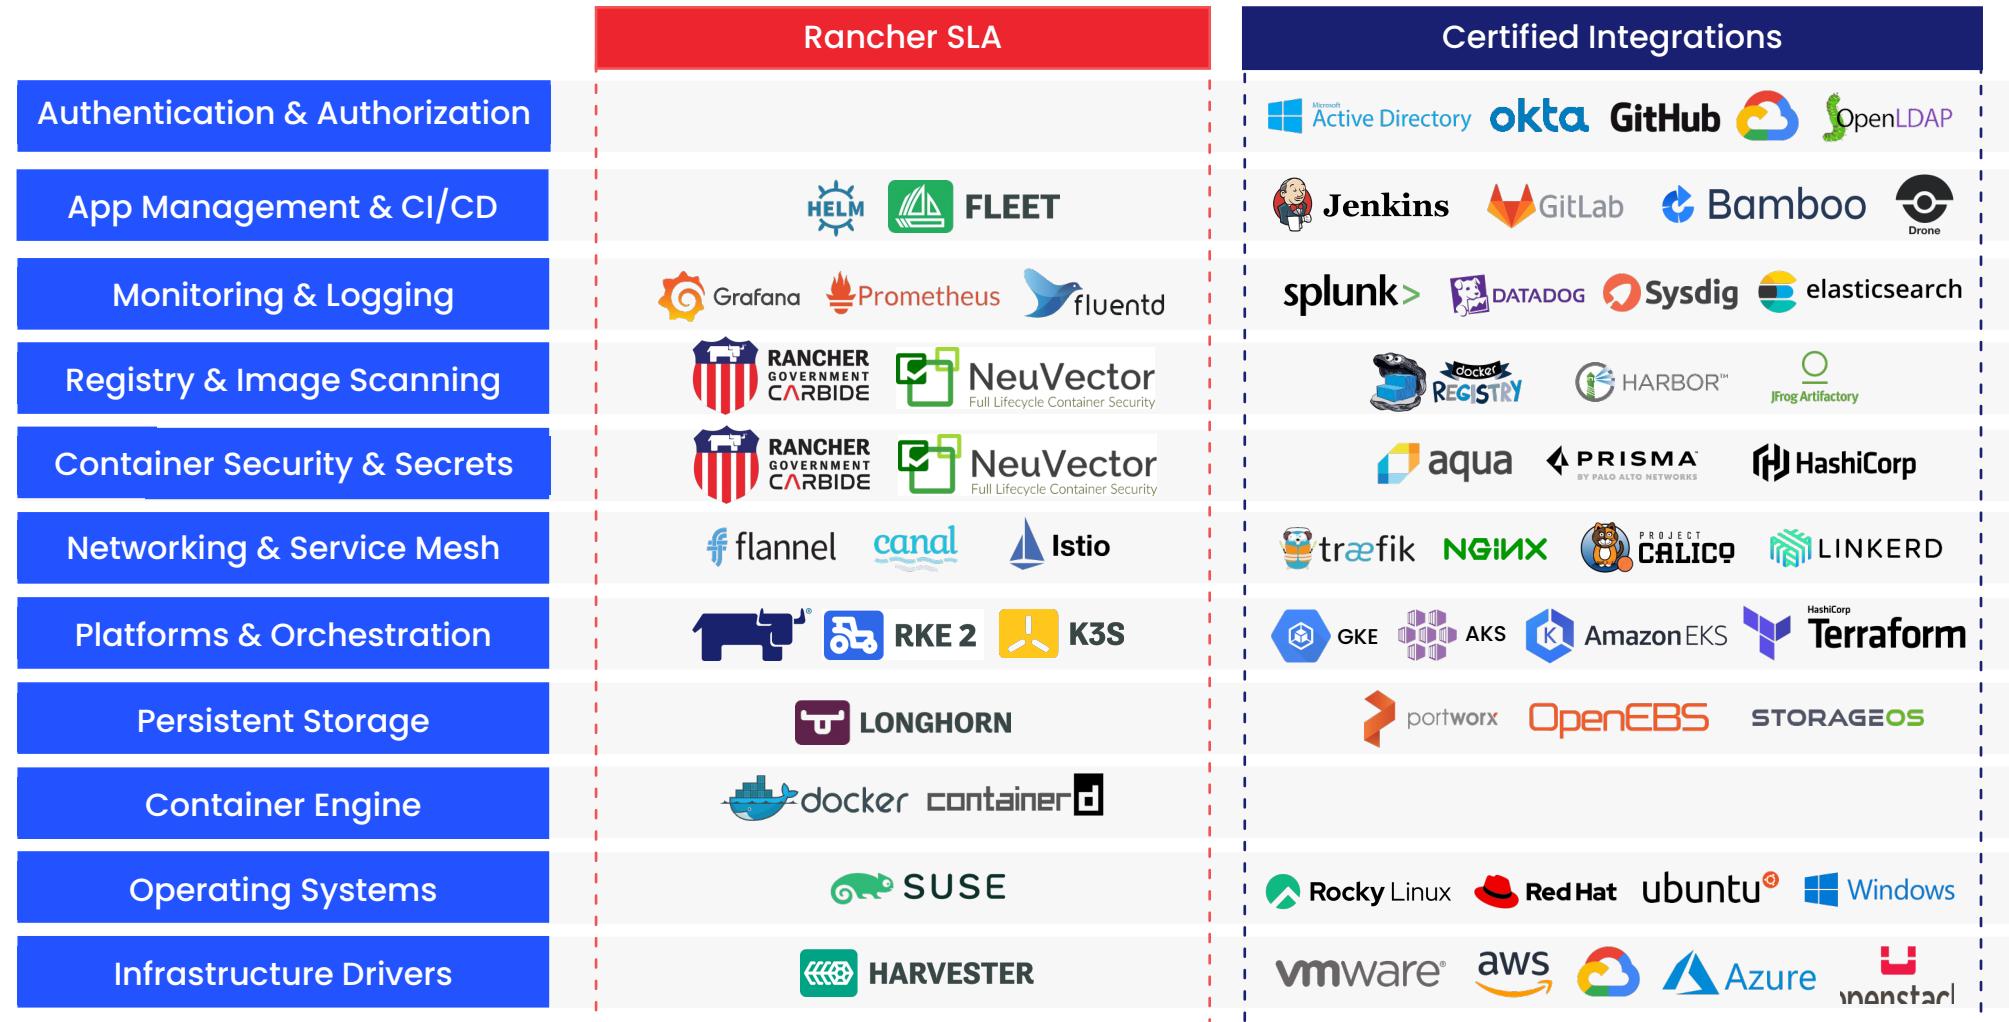

EPINIO

OPNI

The Complete Rancher Stack

Rancher Federal + Amazon AWS

Rancher is the leading Kubernetes distribution and Kubernetes platform.

Amazon AWS is the leading and most adopted cloud provider.

But what does that mean for our customers?

Rancher Federal and Amazon AWS have partnered together to develop a public marketplace offering to dramatically reduce the barrier to entry to Kubernetes in the cloud.

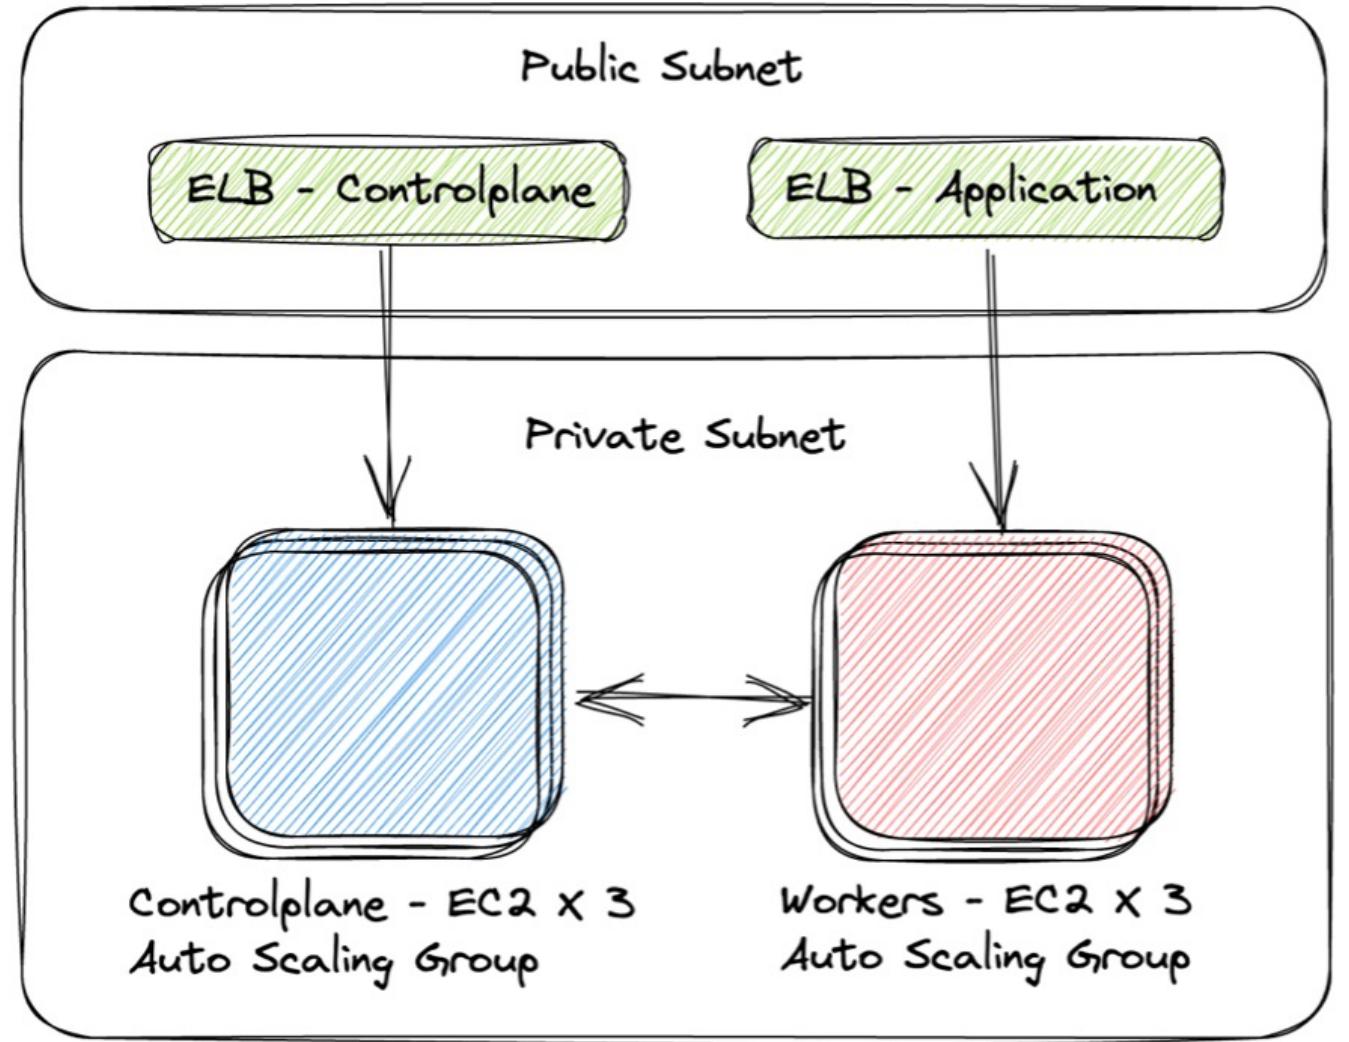

This offering is a free trial of a highly available deployment of RKE2/Rancher Manager on AWS GovCloud (U.S.), designed strictly for use only by U.S. Federal Government Customers.

Architectural Overview

Rancher Manager and RKE2 - AWS

11

Rancher Government Carbide...

Available to all current and future supported customers!

- Secure and Trusted Container Registry (Azure Gov)
- Government STIG Validation (STIGATRON)
- Supply Chain Management Offline Rancher Docs
- SLSA3/SBOMs/Scans
- Built for our U.S. Government Support Customers (Licensed)
- **RGS Answer to E.O. 14028**

Carbide Supply Chain Customer Workflow

STIGATRON

Validate downstream clusters compliance from the centralized Rancher Manager

Monitor

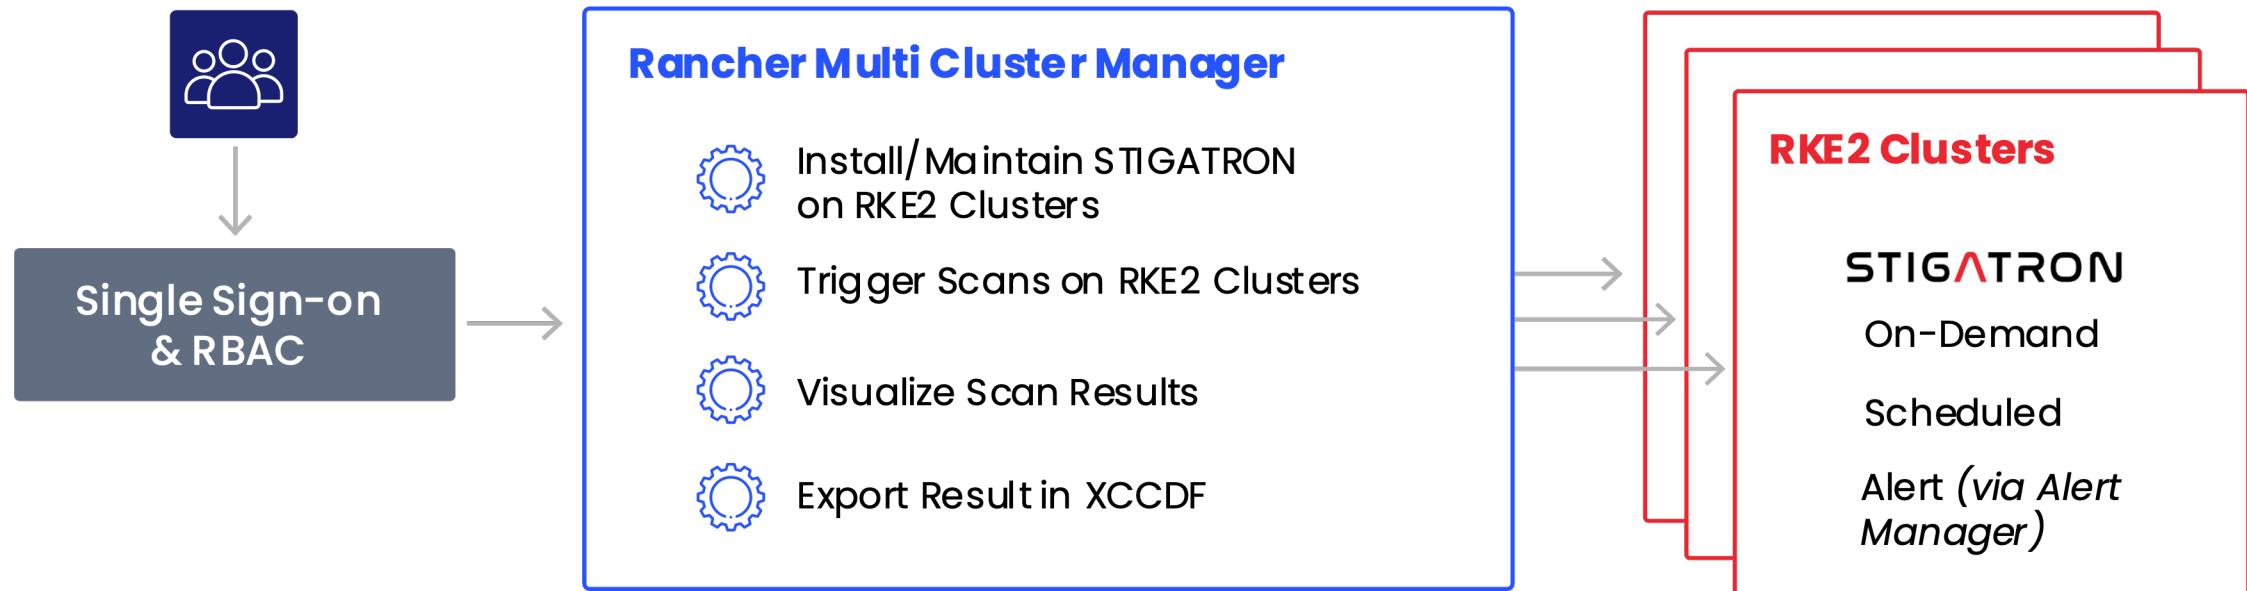

and validate the DISA STIG integrity of downstream RKE2 Kubernetes clusters

Empower

system administrators to refocus their time on more meaningful initiatives

Streamline

cyber auditing and compliance processes
